## **KnowledgeLake Releases Support Plan for SharePoint 2013 Platform**

*KnowledgeLake Announces Agenda for the Highly Anticipated Release of Microsoft SharePoint 2013*

**St. Louis, MO – November 8, 2012** - KnowledgeLake, the market leader in Microsoft SharePoint ECM solutions, has been working closely with Microsoft to ensure their solution features are up and running for SharePoint 2013. The company has announced [KnowledgeLake Imaging](#) will provide new functionality and features that take the greatest advantage of what's new in SharePoint 2013 and offer a range of deployment options, including cloud and on-premises.

"SharePoint enhancements are ever-evolving. At KnowledgeLake we are committed to future-proofing our customers' sound investment in SharePoint by fully supporting the latest versions of Microsoft's product and providing our customers the tools, training and support for continued success," said Floyd Bell, director of product management at KnowledgeLake.

Shortly after Microsoft announced its SharePoint 2013 public beta version, [KnowledgeLake revealed plans](#) to provide exciting enhancements to their document imaging solution, which takes advantage of the new features within the SharePoint 2013 platform.

"KnowledgeLake works closely with Microsoft to ensure that all of our applications will function and work with this new platform. We are taking advantage of new technologies that will be included with the product suite and dedicating time and resources to adapt our products for 2013 support," said Bell.

[A Microsoft Gold Certified Partner](#), KnowledgeLake is a three-time Partner of the Year award recipient and is recognized as the founder of the SharePoint document imaging marketplace in 2003. By innovating on the SharePoint 2013 platform, KnowledgeLake has expanded its current enterprise content management (ECM) features to provide customers with revolutionary solutions that leverage the latest version of SharePoint to solve today's most complex document problems.

KnowledgeLake customers can now apply for access to KnowledgeLake's beta Imaging product for SharePoint 2013.

## **About KnowledgeLake**

KnowledgeLake develops document imaging related products and solutions for Microsoft SharePoint. KnowledgeLake extends the ECM capabilities of SharePoint, enabling businesses to reduce mailing costs, streamline operations, and achieve regulatory compliance using familiar Microsoft products that most businesses already own and use. KnowledgeLake products and solutions are deployed globally in thousands of organizations in many different horizontal and vertical industry sectors including public sector, healthcare, financial services, transportation and more.
