GSCAN MOBILE

Document Capture on Mobile Devices
Productivity Centric User Experience for Mobile Workforce

Executive Summary

According to the Citrix Mobile Analytics Report 2015, over 60% of worker's report working outside the office at least part of the time and the number of devices managed in the enterprise increased by 72% from 2014 to 2015. The latest International Data Corporation (IDC) study on tablets in enterprises shows, that tablets are the only business device for 40% of users. The top blacklisted apps include file sharing application Dropbox and Mail, revealing both the tendency of employees to seek out productivity related apps, and the attempt by IT to get the usage of unmanaged, non-secure third party apps under control. Granting users a secure way to automate content-related business processes is struggle faced by companies with mobile workforces of all sizes in a wide spectrum of industries. GScan Mobile, is the first Windows Phone, iOS and Android App allowing Enterprise Document Capture to be fully integrated with SharePoint Office 365. With SharePoint being the most used ECM System, GScan Mobile streamlines business processes, workflows, and instantly delivers core business information directly from the palm of the hand. GScan Mobile delivers information into SharePoint fast, and enables the entire workflow to be a smooth process.

Challenges & Goals

Organizations with mobile workforce, struggle when it comes to processing information that comes on sheets of papers. Papers which need to be processed, without relying on unsecure third party applications such as Dropbox, which are not part of the company IT infrastructure and therefore don't support workflow integration.
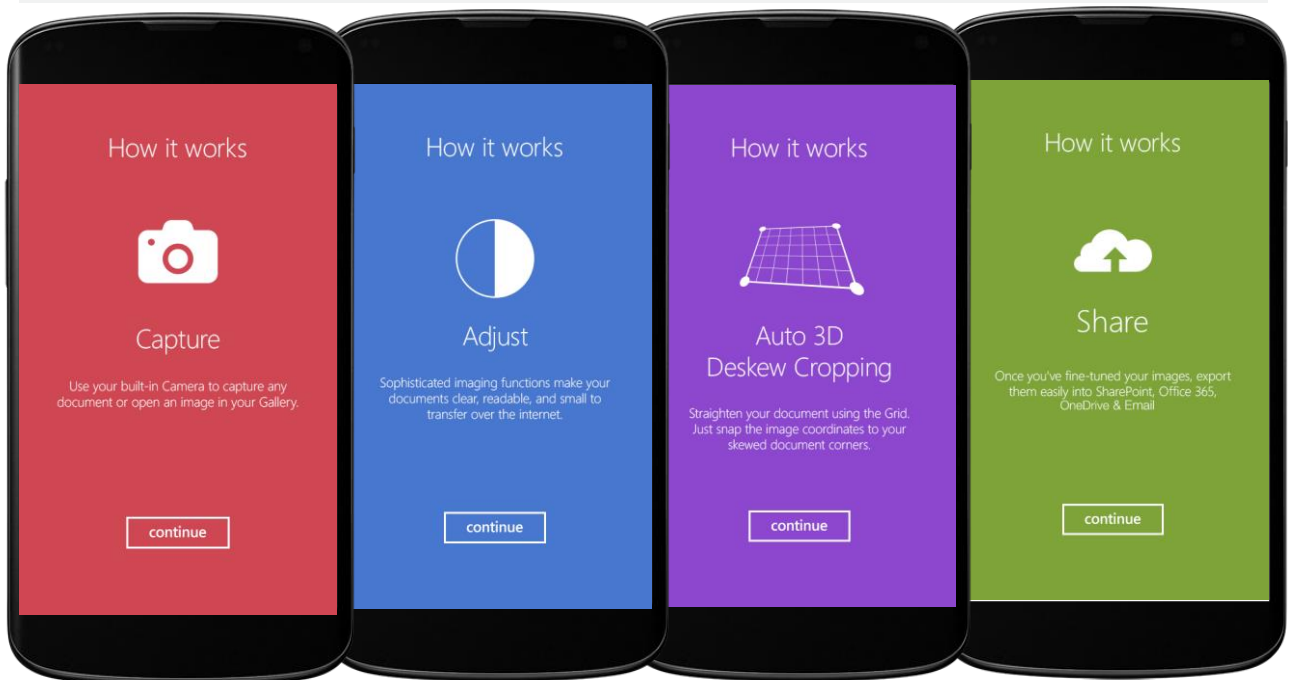

• Providing an ECM solution that combines the flexibility of mobile devices with the security and manageability of centralized control

• Allowing companies to automate content-related business processes on the go

• Ensuring high-quality image processing across various operating systems and devices

• Producing clear, readable documents up to 100x smaller than the original, for easy transfer over mobile network connection, and reduced data consumption

• Creation of multipage documents from captured images by compiling pages into a single document

Solution

GScan Mobile enables mobile workers to **capture documents at the point of creation**. Using GScan Mobile, available as a free application on Windows Phone Store, App Store and Google Play, users can use their smartphone or tablet to capture any type of document - banking, insurance, invoices, contracts, medical claims, business cards, receipts, letters, whiteboards, memos, etc.

GScan Mobile features superior imaging capabilities, such as Auto 3D Deskew, Cropping and Adaptive Thresholding, allowing clear, readable documents up to 100x smaller than the original image size, for quick transfer over the net.

GScan Mobile supports multipage document captures, allowing additional pages to be added to an existing document, and any others, at any time. Supports export of Document Sets, and destination Folders directly into SharePoint Online.

How it works

Capture
Use your built-in Camera to capture any document or open an image in your Gallery.

continue

How it works

Adjust
Sophisticated imaging functions make your documents clear, readable, and small to transfer over the internet.

continue

How it works

Auto 3D Deskew Cropping
Straighten your document using the Grid. Just snap the image coordinates to your skewed document corners.

continue

How it works

Share
Once you've fine-tuned your images, export them easily into SharePoint, Office 365, OneDrive & Email

continue

GScan Mobile supports easy exports & retrievals. Once the user has fine-tuned a document, it can be easily exported to SharePoint libraries via GScan Online or any sharing option supported by the device. GScan Online is the only Native SharePoint App to fully enable Document Capture within SharePoint Online (Office 365). In GScan Online the Click-to-index™ OCR allows users to update index fields without any manual typing necessary. Once the document is processed it can be released into SharePoint Office 365 as a full-text searchable PDF, while staying within SharePoint and the Microsoft Ecosystem, as a whole. The application is available in 9 languages, while GScan Online supports OCR in over 200 languages.

Solution Summary

In today's mobile world, employees aren't always sitting in front of their desktop computers, ready to add information to the organization's enterprise content management (ECM) system. GScan Mobile is a secure out-of-the-box solution, providing great convenience and high-quality user experience that solves the capture on the go problem, and enables smooth workflow integration. GScan Mobile is readily available on all major mobile operating systems, and provides quick and convenient capture of content with any mobile device. It is a solution that works seamlessly with existing infrastructure and can be resilient even on sub-standard networks. With the help of GScan Mobile companies can achieve their vision of enabling the business to leverage a mobile workforce.

Connecting GScan Mobile with GScan Online and SharePoint provides increased flexibility and ability to streamline business processes and workflows within any organization. GScan Mobile together with GScan Online and SharePoint create a powerful platform for the business to grab the opportunity of mobile with minimum effort.

We believe...

At GRADIENT, we strongly believe in enabling people the flexibility, ease, and right to transform their everyday document-centric needs, with the use of today's most modern technologies. GRADIENT helps enterprises smash the scan & capture barrier making a more efficient paperless office. We believe in a more social, environmentally proactive, and economically sustainable approach to people facing challenges in today's modern and fast-paced society, by making our products advanced in functionality, simple to use, beautifully designed, and user-friendly.

We offer top of the line, award-winning Scanning and OCR enhanced document recognition, and mobility solutions to fit your every needs. The GScan line of products transform and innovate your competitive edge, increase productivity, and growth of your business, whilst reducing operating expenses.

We strive to educate and inspire people to make the most of what solid solutions are out there to enable them to reach their peak potentials, gain a competitive edge and further grow their business with SharePoint and Office 365.

GScan Online and GScan Mobile are sophisticated and advanced solutions, as proved by the Best Mobile Solution ESPC 2014 and 2015 Awards, that suit a variety of different industry sectors which require Document Capture, OCR indexing and mobility.
