

harmon.ie Mobile Apps

Full-featured, secure access to Office 365™ and SharePoint® from the convenience of your mobile devices.

Product Benefits

Drive Adoption of Office 365 and SharePoint Social Networks

harmon.ie Mobile Apps provides a single-screen experience for SharePoint, Office 365, OneDrive for Business, Yammer, and Skype for Business. Users now collaborate with colleagues in one app.

NEW! Manage Projects Effortlessly

Manage all project-related activities in a single screen.

Drive Office 365 Business Initiatives

Integrating SharePoint, Office 365, OneDrive for Business, Yammer, and Skype for Business into one app means users can be productive quickly; no need to hop between apps or a browser to collaborate with colleagues.

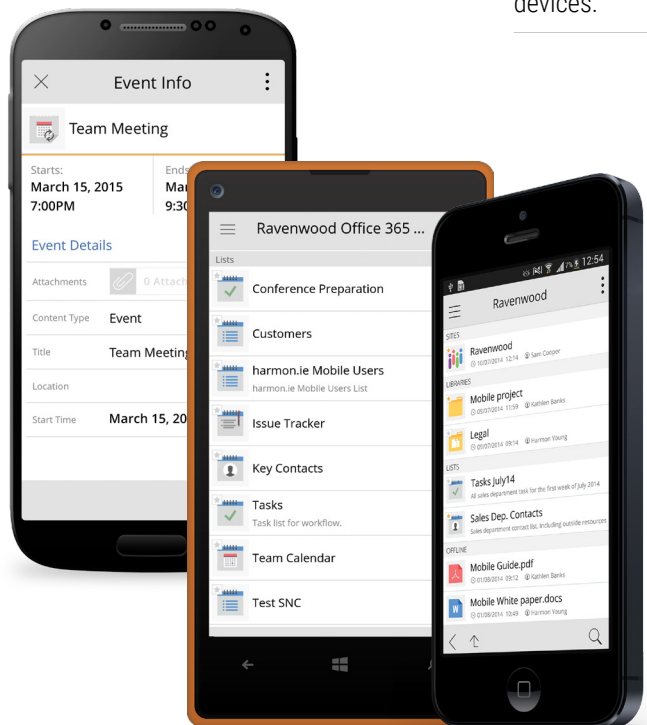

Attain Enterprise Security

harmon.ie Mobile Apps supports all leading MDM solutions to provide secure, full-featured access to documents stored on Office 365 and SharePoint from mobile devices.

NEW! Empower the Digital Workplace

harmon.ie Mobile Apps is the first product to enable users to be completely productive from mobile devices. Upload documents, images, and videos, annotate PDF documents on the go, and access documents offline.

Plus, reach out to colleagues using Yammer or Skype for Business and follow/update SharePoint tasks and calendar events... all from a single app.

About harmon.ie

harmon.ie provides a suite of user experience products that empower today's distributed workforce to get work done on their own terms. We put people first, insulating them from technology complexity, enabling information workers to complete many workplace tasks directly from the friendly confines of their email client. For Microsoft customers, harmon.ie increases the adoption and return on investments for SharePoint by bringing it directly into Outlook.

Thousands of enterprise customers count on harmon.ie to provide seamless information governance, collaboration, knowledge retention and email and records management using SharePoint, Office 365 and other collaboration tools. harmon.ie is a Microsoft Partner of the Year Finalist and an IBM global partner.

Product Features

Document Sharing and Browsing

Share documents easily

Upload and share documents and email attachments easily.

Author documents on the go

Perform check-in, check-out and manage SharePoint metadata fields when authoring documents. harmon.ie prompts users to complete required metadata so documents can be found later.

Preview and edit documents

Use third-party tools to edit documents offline. View and edit documents using Office Apps or Office Online.

Unparalleled Offline support

Save and edit Office 365/SharePoint documents, and annotate PDF documents while offline. Ensuring users have the latest document versions when offline brings a new dimension to emergency response and business continuity initiatives, and fulfills sales and support requirements for access to offline documentation.

NEW! Upload and share images & videos

Upload multiple images and videos from a mobile device, even when offline.

harmon.ie syncs the images when you reconnect to a network.

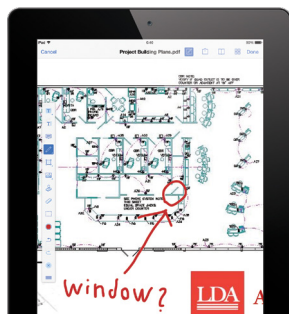

Access SharePoint lists

Create, edit and read SharePoint list items including calendar tasks, issues, contacts, links and announcements.

Document versions

View and restore earlier document versions from your mobile device.

Annotate PDF documents directly from your mobile device, even when offline.

Social Features

Search for people

Search for colleagues with phonetic 'fuzzy' name search, based on department, skills, expertise and other attributes.

Access SharePoint Newsfeeds and Wikis

Follow newsfeeds and participate in wiki discussions, directly from your mobile device.

Collaborate on documents

Reach out to colleagues while viewing/editing a document via Skype for Business, phone or email. View a colleague's complete SharePoint profile and access their OneDrive for Business...all with a single click.

Participate in Yammer discussions

Initiate and take part in Yammer group conversations, while viewing/editing a document.

Share a document or SharePoint list item with a group, using Yammer.

Real-time Collaboration

Update activity stream

Receive real-time updates of SharePoint documents and people status changes.

Being able to follow documents and people is the only way to track progress on a project initiative, in real time.

Find documents

Find SharePoint documents by performing a search, browse, sort, or 'go to location' operation, making it easy to find information while away from the office.

Collaborate in context

View colleagues' complete SharePoint profiles and reach out to them via phone, email, Skype for Business, or Yammer. No need to cut and paste phone numbers or navigate to a different app to send an email. Keeping 'it all' in one place makes it easy to focus on the collaboration task by eliminating the need to navigate between apps and a browser.

Enterprise Features

Central app deployment

Organizations can deploy harmon.ie via MDM or via download from the App Store (together with a software component from harmon.ie).

Centralized site provisioning

IT administrators can provision sites, favorites, and user-specific settings. End users can locate provisioned sites via a simple e-mail link or site lookup. Set up has never been easier.

Share sites and favorite locations

harmon.ie automatically shares sites and 'favorite' locations across harmon.ie desktop and mobile products.

Secure document collaboration with leading MDM solutions

Working in conjunction with leading Mobile Device Management vendors.

System requirements

- Office 365 (SharePoint Online) and SharePoint Foundation.
- SharePoint 2013 on-premise, 2010, Office SharePoint Server (MOSS) 2007, Windows SharePoint Services (WSS) version 3.0.
- iOS 6.0 or newer, Android 4.0 and above, BlackBerry 10 and Windows Phone 8 and above.
