

European SharePoint Conference

VIENNA 2016

Accelerate SharePoint Success: How to Best Plan, Manage & Control Migration Projects

Dux Raymond Sy, PMP

Chief Technology Officer
Microsoft Regional Director & MVP
AvePoint, Inc.
USA

Session Objectives

1

Identify common SharePoint migration challenges

2

Showcase the 4 steps to accelerate SharePoint migration success

3

Impart winning & proven migration framework to ensure migration success

Look Familiar?

Office 365
Throttling limit

Various
content sources

Do we need to
migrate everything?

Lack of migration experience

SharePoint
customizations

Data
Classification

Sustainable adoption plan

Migration Challenges:

- 42% of organizations still have investments on SharePoint 2010
- 37% say they will migrate to SharePoint 2016 within one year
- Over 34% are deploying Office 365
- No direct migration path
- 50% either are using or will acquire migration tools in the next 12-18 months

4 Steps to Accelerate SharePoint Success

Establish Migration Framework

Develop Project Plan

Execute
Migration

Facilitate
Sustainable
Adoption

Establish Migration Framework

1

Establish a Pragmatic Approach

1

Discovery

Inventory of content, SharePoint topology, customizations, workflows, etc.

2

Assessment

Prepare design approach and customization remediation

3

Pilot

Execute pilot migration use cases, establish throughput projections

4

Execution

Full and Incremental migration, remediation, Compliance reporting*

5

Support

Ensure any unexpected issues are resolved

Discovery

Identify and Prepare Migration Source

Perform Farm, Customization and Data Analysis

Information Gathering Workshops
(Data Pruning, Data Classification,
Compliance, Refactoring)

Assessment

Categorize Data

Customization inventory and remediation

Schedule and Communication Management

Information Presentation

Pilot Migration

Create migration plans, settings
and execute pilot

Throughput modeling

Establish communication and
reporting framework

Adjust architecture

Execution

Migration execution

Compliance scanning and reporting

Data validation, User Acceptance

Post-Migration remediation and Incremental sequencing

Support

Support your environment until you are ready to sunset

Resolve Any Issues

User Onboarding

Develop Project Plan

2

Define and Validate Requirements

8 5 4 9 1 7 6 3 2 0

SharePoint

Consider Typical Business Challenges

Common
Pain Points

Identify
Quick Wins

Go After Low Hanging Fruits

Top Tasks & Needs Differ by Functions

Engineering, Research & Development

Share best practices across geographies

Operations, Manufacturing & Logistics

Improve and monitor business processes

Sales, Marketing, PR & Communications

Align Sales and Marketing teams

HR & Legal Services

Gather & process forms from employees

Accounting, Finance & Procurement

Pull data and build financial reports

Administration

Organize teams and manage calendars

Prioritize Business Needs

Migration Options

Manual

1. Create SharePoint Farm
2. Copy databases to new farm
3. Upgrade Service Applications
4. Upgrade Content Databases
5. Upgrade Site Collections

3rd Party Tools

Compliant Migration Approach

Finish

IT Can You Handle This?

Business Engagement

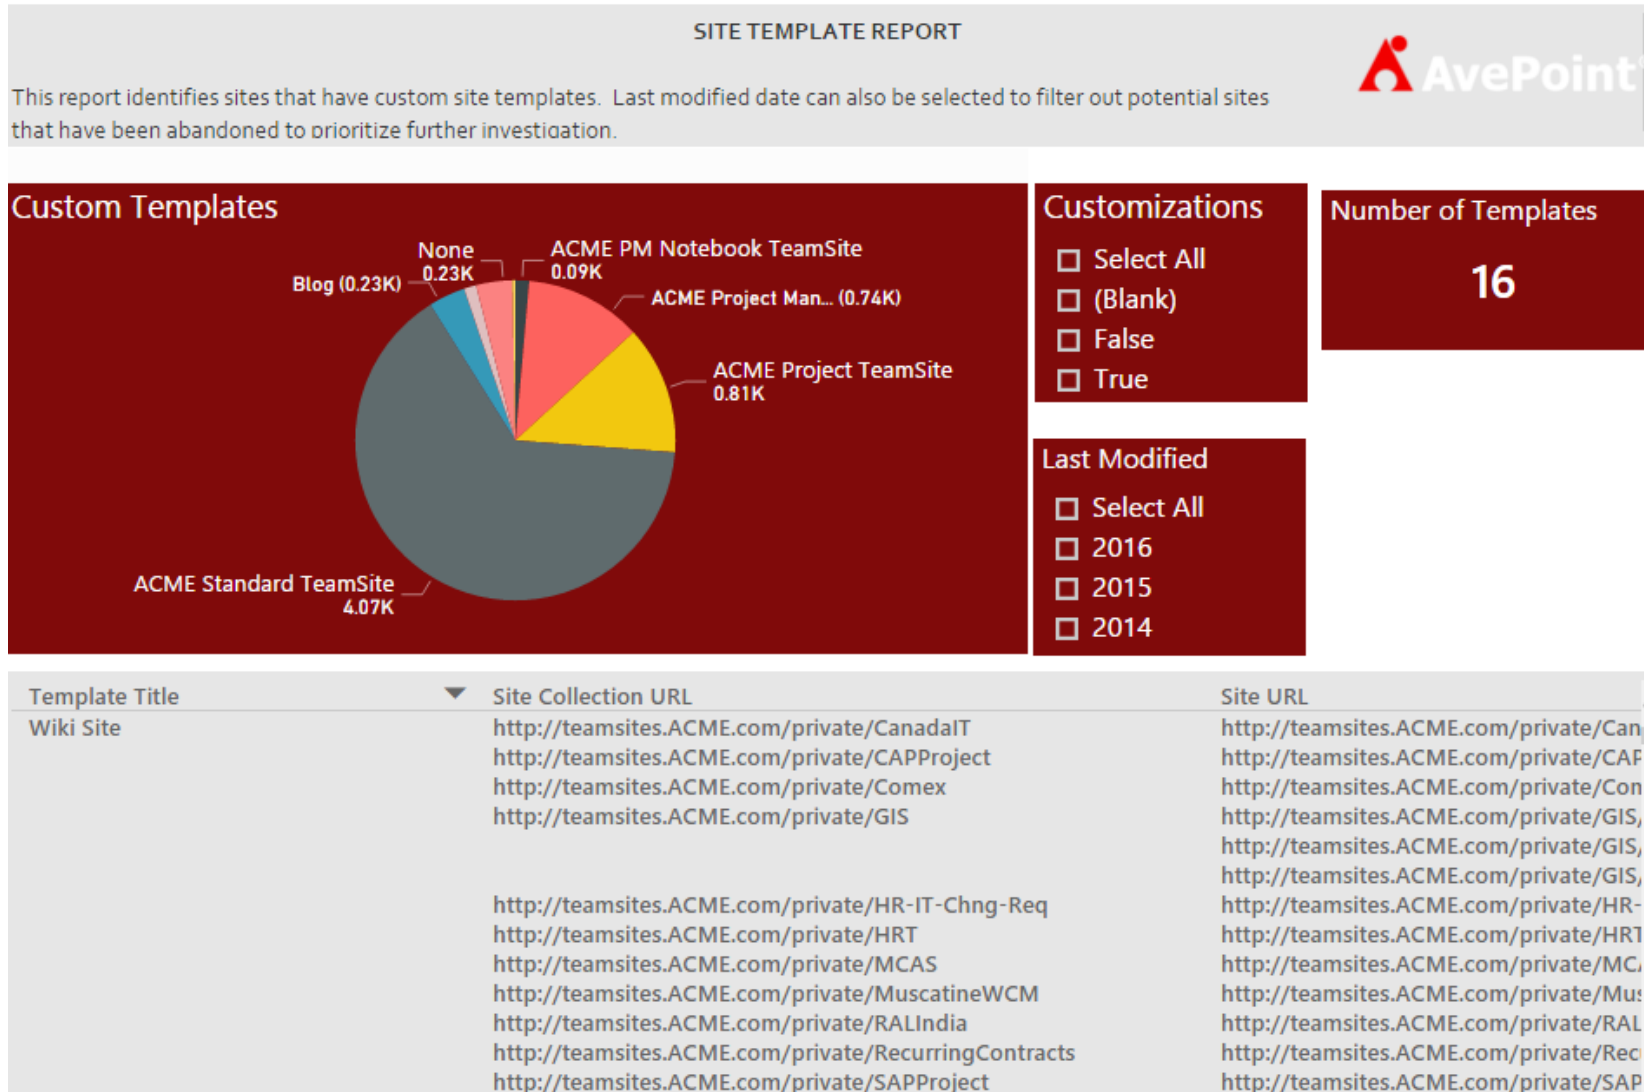

Migration

Support &
Maintenance

Project Execution

Discovery

Source System Scans

Migration Design Workshops

- Pruning and exclusion criteria
- Rules that define the file size, URL limitations to be applied during the migration project
- Scheduling and orchestration of migration
- Content reorganization
- Content classification and tagging guidelines
- Permission guidelines
- Optimal migration architecture (e.g. use of Azure Infrastructure vs. Local Services, HSM vs. CSOM, Database Migration, etc.) necessary to complete the project

Assessment

Migration Design Considerations

- Data classification (analysis based on age, size, source, etc.)
- Classification based on ownership
- Site and Content classification (for SharePoint only)
- Classification based on complexity
- Classification based on ability to migrate
- Customization inventory (for SharePoint source content only)
- Data migration rules and migration profiles

Source Complexity

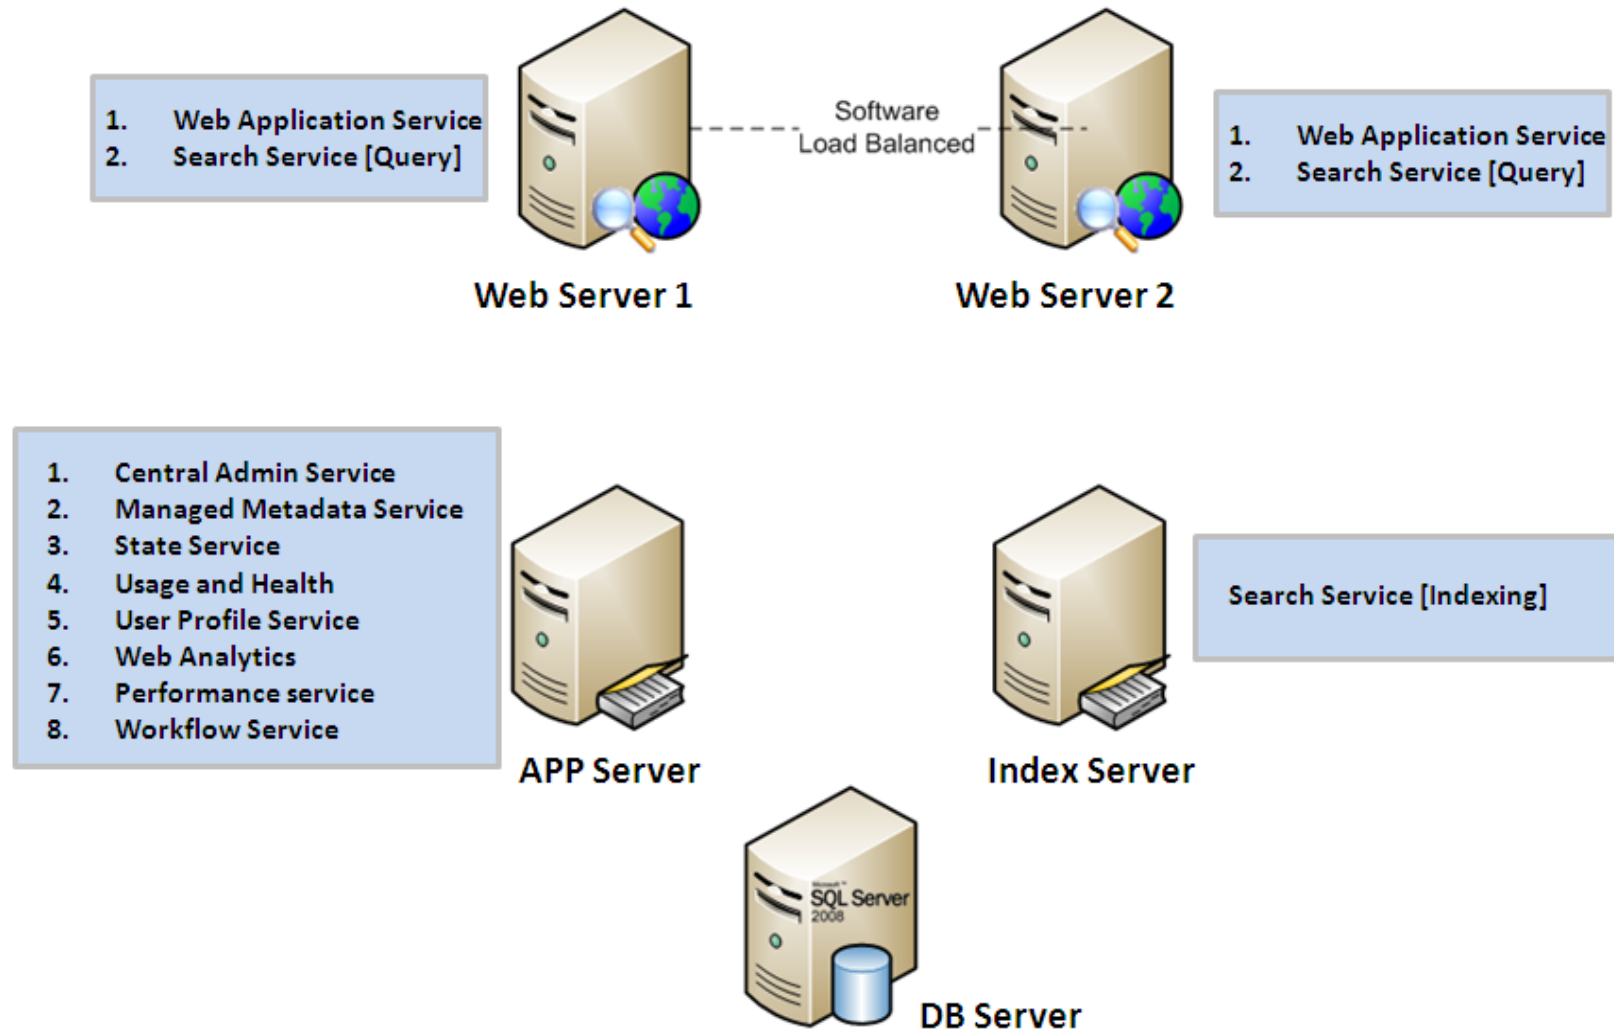

Complexity Type	Description
Tier A - Low complexity	No customization or customization has equivalent SharePoint or Office 365 functionality
Tier B - Medium Complexity	Customization that can be easily be ported as part of migration e.g. SharePoint builtin workflows, custom content types etc.
Tier C - High Complexity	Customization that requires "re-development" before migration to new environment

Pilot Migration

Pilot Activities

- Create and execute a series of pilot migrations for each of the source systems
- Validate the migration design profiles
- Confirm and adjust migration architecture based on performance analysis
- Validate any tools, scripts or dependencies Simulate user acceptance process with a before and after snapshot of a sample

Finalize Architecture

Full Migration

Execute Migration

Migration Validation

- Compare object counts between source and destination
- Spot check pages, metadata, permissions, webparts, etc.

Incremental Migration

- Address migration variance
- Set source to read only once incremental migration is completed

Migration Support

T1-T3 support

Remediation plan

Prioritization

Facilitate Sustainable Adoption

4

Change is
often met with
resistance

53% decline in
workforce productivity.

Why Training Alone Is Not Working

Non-Contextual

Unclear Roles

Generational Gap

What's In It For Me?

Facilitate Sustainable Adoption

Drive Excitement

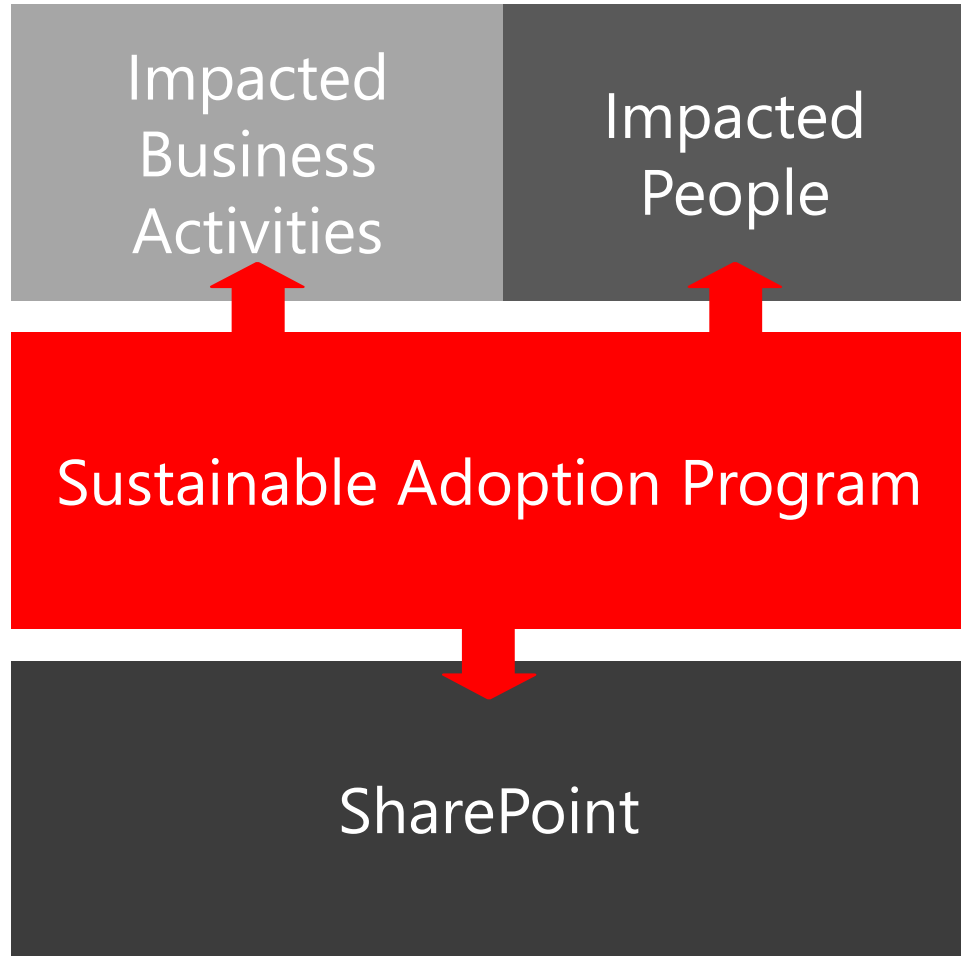

Facilitate Change

Empower and Assist

Sustainable Adoption Objectives

- Minimize the negative impact of making technology changes
- Promote the adoption of new systems and solutions
- Provide users with the resources they need to be successful
- Encourage an organization culture which embraces on-going evolution.

Make it Easy
to Do the
Right Thing

Establish Scalable Support

4 Steps to Accelerate SharePoint Success

Establish Migration Framework

Develop Project Plan

Execute
Migration

AvePoint's Migration as a Service

Let the Experts Take Care of You

AvePoint is the industry leader in SharePoint information management. Trust our proven white glove migration services approach to reduce risk while you focus on your core business

The ONLY Software owned Service

AvePoint Migration as a Service coupled with our award winning world-class solutions, is the ONLY software owned migration service in the world today.

Unique Framework

Migration Assessment

Migration Planning and Design

Migration Implementation
