### Power Platform Competencies

#### Power Platform Services

##### Consulting

Free art of possible workshops.

##### Implementation

Free proof of concept.

##### Governance & Support

Free Power Platform risk assessment.

##### CoE/CoP

Free Power Platform maturity assessment.

##### Migration

Free migration assessment.

##### Trainings

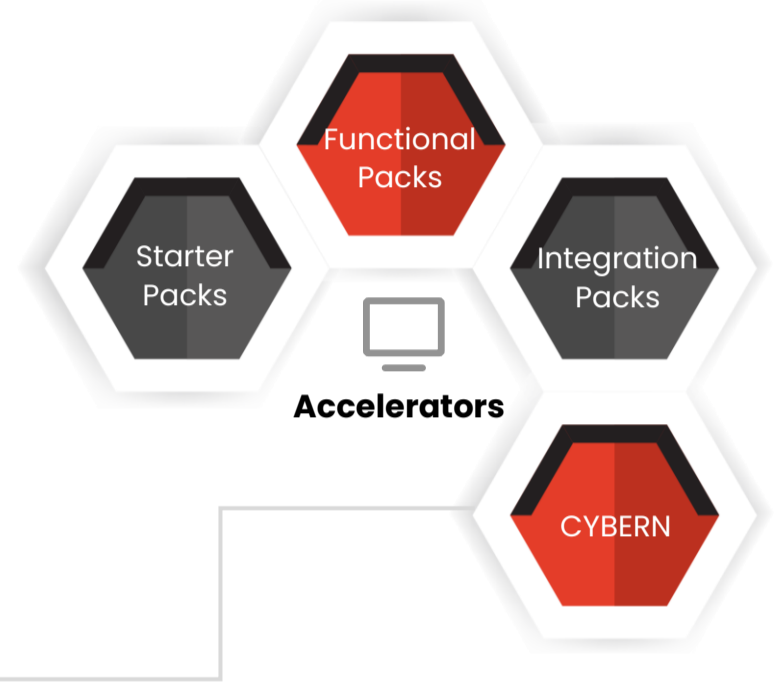

Free single day Power Platform training.

#### Power Platform Capabilities

AI powered end to end low-code platform

- Power Apps
- Power Automate
- Power Pages
- AI Builder
- Copilot Studio Agents
- Security & Governance
- Cloud/On-Prem Integrations
- Power Platform Extensibility

#### CYBERN

iLink Power Platform Governance Solution

Unlock the full potential of your Power Platform deployment with our COE Governance Solution. Tailored to complement the existing COE Starter Kit, our solution bridges identified gaps and caters to specific organizational needs, ensuring effective management, governance, and scalability.

##### Pain Points

- Lack of Comprehensive Visibility
- Governance Gridlock
- Manual Effort Mayhem
- Slow Time-To-Market
- Stakeholder Disconnect

##### Key Features

- Curated collection of Apps
- Current State Assessment
- Centralized Location of Repository
- Best Practice reports
- Harmonization of Workflow
- Effective Liaison

##### Benefits

- Enhanced Visibility and Control
- Increased Efficiency
- Risk Mitigation

### Credentials and Capabilities

#### Temporary Price Discount (TPD) App

The client aimed to enhance their operational efficiency, ICS team's workflow, enabling seamless submission of requests for review and approvals by higher management tiers.

#### iSec- User Access Management

The goal was to modernize and streamline client's workflow for managing User Access Requests, facilitating smooth submission and review by various departmental tiers.

#### Workflow automation - Healthcare

iLink collaborated with a leading vet healthcare provider to design workflows for their visit management system including workflow enhancements.

#### Power Automate

Client Bank undertook a comprehensive migration from Blue Prism and Automation Edge to Microsoft's Power Automate to enhance operational efficiency, reduce costs, and leverage advanced automation capabilities

#### Online Market Place

The client pioneered the online marketplace concept very early when a group of procurement professionals in Florida decided that the best way to reach more qualified suppliers was to aggregate their lists so that everyone could get the best products at the best rates.

#### Hackathon Goal

Innovate and streamline veterinary dental visit workflows using AI and digital solutions and develop applications to enhance veterinary care processes.

#### Accomplishment

- Medical notes and aftercare instructions (**Scribe**)
- Anesthesia management during surgery (**Anesthesia**)
- Dental examination and records (**Dental**)

#### How did we do it?

- Increased engagement and enthusiasm among PMs and business leaders.
- Highlighted the value and potential of the Power Platform, accelerating its adoption across the Product Group.
- Real-time data processing and accuracy for effective application performance.

#### Outcome

- Comprehensive Veterinary Care**
  - Holistic Approach
  - Enhanced Patient Care
  - Data-Driven Decisions

#### Microsoft AI Integration

- AI-powered Insights
- Natural Language Processing
- Machine Learning
- Cognitive Services
